FX

Flexible partnership approach for different market needs

Mkulima Crops Ltd. Tanzania

Local platform built for distributor partnerships and farmer-facing market development.

Mkulima Crops Ltd. brings the Peters & Burg Group portfolio to Tanzania through registration support, import workflow, distribution cooperation and field-oriented product promotion.

Individual client approach

Commercial terms, pack-size mix and launch support can be adapted to partner needs.

Farmer field support

Assistance with field demonstrations, feedback collection and practical agronomic communication.

Marketing materials

Brochures, presentations and product information prepared for distributor teams and field use.

Flexible supply volumes

From medium commercial lots to large distributor orders, supported by European-quality production.

Regulatory platform

Local registration, import and documentation coordination for crop protection products.

**PARTNER
READY**

Registered crop protection portfolio

A focused launch range for Tanzania — with maize, cereals as the strongest entry platform.

Three registered products are available for commercial discussions. A fourth product is expected to expand the portfolio in Summer 2026.

Herbicide

Legenda 105 OD

Maize

Annual grass and broadleaf weeds

Insecticide

Courage Duo 150 ZC

Maize & sunflower & soybean & rape

FAW, armyworms, stem borers and cornworms

Fungicide

Focus 300 SC

Wheat & barley & rape

Rust diseases

Next registration expected: Summer 2026 — additional insecticide portfolio expansion

REGISTERED IN TANZANIA

Legenda 105 OD

Herbicide | Mesotrione 75 g/L + Nicosulfuron 30 g/L

Post-emergence weed control for maize

Crop, target and rate

Maize

1.5–2.0 L/ha

Synergistic post-emergence control of annual grass and broadleaf weeds. Apply when maize is at 3–6 leaf stage; weeds at 2–6 leaves/rosette; perennial grasses 10–20 cm.

Key benefits:

A strong post-emergence maize herbicide for Tanzanian conditions: broad grass and broadleaf weed control in one treatment, better leaf coverage and rainfastness, less manual weeding and stronger yield protection.

Legenda 105 OD

Maize herbicide | **Mesotrione 75 g/L + Nicosulfuron 30 g/L**

Cleaner maize fields with fewer passes and less hand weeding.

- ✓ One spray for key grass and broadleaf weeds in maize.
- ✓ OD technology improves leaf coverage and faster rainfastness.
- ✓ Cleaner fields with less manual weeding and lower labour costs.
- ✓ Dual modes of action support stronger control and resistance management.
- ✓ Ready-to-use combination: no tank-mixing and fewer field mistakes.

Legenda 105 OD

REGISTERED IN TANZANIA

Courage Duo 150 ZC

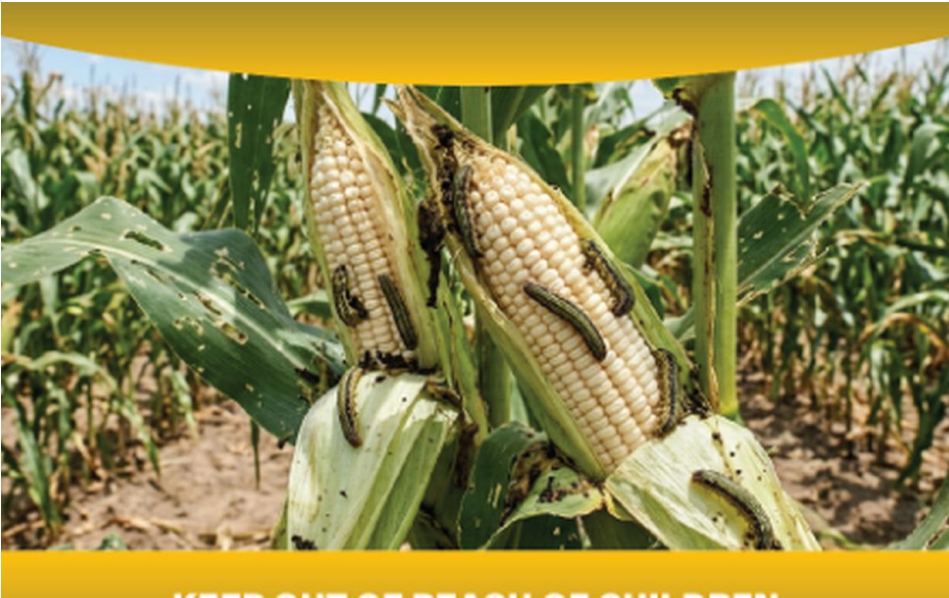

Insecticide | Chlorantraniliprole 100 g/L + Alpha-cypermethrin 50 g/L

Caterpillar control for different types of crop

Crop, target and rate

Maize	200–250 ml/ha	Caterpillars such as Fall Armyworm, African armyworm, stem borers and cornworms. Apply as soon as infestation is observed; repeat after 7 days if infestation persists.
Sunflower*	0.10–0.15 L/ha	Cutworms, weevils, meadow moth, sunflower moth and cotton bollworm according to dossier/global experience.
Soybean*	0.15–0.25 L/ha	Cotton bollworm, bean/acacia moth and soybean moth according to dossier/global experience.
Rapeseed*	0.15–0.20 L/ha	Cotton bollworm and lepidopteran pest complex according to dossier/global experience.

Winter wheat, soy, rape, corn, broccoli, cauliflower, green herbs, celery, parsley, coriander, chives, sage, thyme, rosemary, oregano, basil, mint, tarragon, marjoram, lettuce (head), salad, arugula* - crops are shown as global/dossier experience.

PHI / REI: 20 days / 24 hours

Key benefits:
Powerful maize protection against fall armyworm and caterpillar pests: **fast knockdown, lasting control and ZC technology** designed to reach the whorl where larvae feed.

* According to global experience / dossier data. Tanzania labels, claims and use directions must follow the approved TPHA registration documents.

Courage Duo 150 ZC

Insecticide | Chlorantraniliprole 100 g/L + Alpha-cypermethrin 50 g/L

Fast, trusted maize protection against FAW and caterpillars.

- ✓ Strong protection of maize against fall armyworm and other caterpillars.
- ✓ Fast knockdown plus long-lasting control in a single product.
- ✓ Dual modes of action help delay resistance and keep products effective.
- ✓ ZC formulation improves coverage of leaves and the whorl.
- ✓ Ready-mix formula that is easy to explain, use and trust in Tanzanian fields.

Courage Duo 150 ZC

REGISTERED IN TANZANIA

Focus 300 SC

Fungicide | Tebuconazole 225 g/L + Flutriafol 75 g/L

Rust disease control for cereals and rape even in rainy season

Crop, target and rate

Wheat	0.70 L/ha	Rust diseases. Apply at onset of disease development and repeat after 7 days if needed; ensure even foliar coverage.
Barley	0.70 L/ha	Rust diseases. Apply at onset of disease development and repeat after 7 days if needed; ensure even foliar coverage.
Rape*	0.50–0.75 L/ha	Sclerotinia and Alternaria according to dossier/global experience.

PHI / REI: 28 days / 12 hours

Key benefits:

Reliable wheat and barley disease protection: two systemic active ingredients help protect the flag leaf and ear, supporting grain fill and yield potential in rainy seasons.

* According to global experience / dossier data. Tanzania labels, claims and use directions must follow the approved TPHPA registration documents.

Focus 300 SC

Wheat & barley fungicide | Tebuconazole 225 g/L + Flutriafol 75 g/L

Reliable protection of wheat and barley against the main foliar fungi diseases in Tanzania: rusts, septoria, tan spot and powdery mildew

- ✓ Strong rust shield for Tanzanian wheat and barley.
- ✓ One fungicide for rusts, septoria, tan spot and powdery mildew.
- ✓ Protects the flag leaf and ear — more grain in every bag.
- ✓ Curative and preventive action for flexible, reliable spray timing.
- ✓ Easy-to-use SC formulation for large farms and smallholders.

Focus 300 SC

EXPECTED REGISTRATION • SUMMER 2026

Kontador Duo

Insecticide | Imidacloprid 300 g/L + Lambda-cyhalothrin 100 g/L

Pipeline product for the next step of the Mkulima Crops portfolio in Tanzania.

Indicative crops, targets and rates*

Crop*	Rate	Target pests / positioning*
Wheat	0.06–0.08 L/ha	Cereal beetles, aphids, cereal flies, wheat thrips, cereal leafhoppers and bread weevil
Soybean	0.05–0.07 L/ha	Acacia moth, scoops and other relevant sucking / chewing pests
Rape	0.05–0.06 L/ha	Rape flower beetle, cruciferous flea beetles and related oilseed pests
Corn	0.05–0.07 L/ha	Stem corn borer and selected maize pest complex

Contact + systemic activity

Positioned for pest-control programs in cereals, oilseeds and maize.

Designed as a compact, low-dose insecticide option for professional distributor portfolios.

* Pipeline product. Crop directions, claims and rates are indicative and subject to registration review and final approved Tanzania documentation.

Cooperation with Tanzanian distributors

Reliable crop protection supply, local market activation and practical field support.

Why partner with Mkulima Crops Ltd.?

Partnership model

Commercial cooperation with professional Tanzanian distributors.

Market activation

Presentations, brochures and field communication tools.

Supply flexibility

Medium to large commercial lots with European-quality supply discipline.

Farmer support

Field visits, demonstration feedback and practical agronomic positioning.

Next step

Let us discuss distributor model, first order mix and launch support for the Tanzania market.
